

INDUSTRIAL WAREHOUSE - BONDENO (FERRARA)

AN ENERGY-EFFICIENT ROOF WITH MULTIBOX PANELS

In Bondeno, in the province of Ferrara, Sistem Costruzioni has created the roofing of a warehouse for warehouse use using the MultiBox construction technology, a modular and customizable system composed of prefabricated panels, which integrates the roof and false ceiling of the buildings into a single module. The system brings the typical concept of sheet metal sandwich panels to the world of wood: a structurally and aesthetically "finished" product, ready to assemble and already equipped with the required thermal and acoustic characteristics.

PRODUCT SPECIFICATION

- Industrial building
- Localization:** Bondeno (FE)
- Intended use:** Factories
- Architeturale and structural design:** Ing. Umberto Zampieri
- Total area:** 375ft

BUILDING SYSTEM

XLAM

Reasons for choosing the Xlam system

The Xlam system is a technical innovation in the construction of timber homes and buildings. The system's exceptional versatility allows the creation of a wide range of architectural constructions, including multi-storey **timber buildings**. The system assures **optimal thermal insulation** and a high level of **fire resistance**, a fast drying process and exceptional **acoustic insulation**.

About the Xlam system

The Xlam panel is composed of crossed layers bonded together, making the construction system extremely **versatile**. Composed of 99.4% timber and 0.6% adhesives, Xlam is considered to be a monolithic material **capable of supporting very high loads and withstanding external stresses and seismic activity**.
