

KINDERGARTEN - MASSA AND COZZILE (PISTOIA)

A BI-BUILDING ENVIRONMENT DEDICATED TO CHILDREN

The nursery school of Massa e Cozzile (Pistoia) is a building whose prerogative is to guarantee living well-being through high standards of energy efficiency and thermal comfort, which make it a virtuous example of bio-architecture at the service of an environment dedicated to children. The structure, made entirely of Xlam is characterized by areas with double volume and spread over a total area of 1,200 square meters.

PRODUCT SPECIFICATION

School
Localization: Massa e Cozzile (Pistoia)
Intended use: Schools
Architetural and structural design:
Total area: 1200ft

BUILDING SYSTEM

XLAM

Reasons for choosing the Xlam system

The Xlam system is a technical innovation in the construction of timber homes and buildings. The system's exceptional versatility allows the creation of a wide range of architectural constructions, including multi-storey **timber buildings**. The system assures **optimal thermal insulation** and a high level of **fire resistance**, a fast drying process and exceptional **acoustic insulation**.

About the Xlam system

The Xlam panel is composed of crossed layers bonded together, making the construction system extremely **versatile**. Composed of 99.4% timber and 0.6% adhesives, Xlam is considered to be a monolithic material **capable of supporting very high loads and withstanding external stresses and seismic activity**.
